

Do not use the name and logo The Live-it is a private brand.

1. How to change the color of ActionBar?

Folders values, values-v11-v14 values and there is a styles.xml file. Look for the line `<item name="background">@color/blue_dark</item>` and change to the color of your preference. All colors are on file in the values folder cores.xml.

2. How to change the icons in the list of Navigation Drawer?

Step into the package "br.liveo.utils" and open the Utils.java class, you will find "`iconNavigation`". There are all icons that are used in the list.

Note: The zeros "0" indicates that the item is a category, then there is no need to have icon.

3. How to change the names on the list?

In values and values-en-RBR folder is a file named "arrays.xml". It is there where all the names that are used in the list.

4. Changing the color of the counter?

In drawable folder look for "rectangle_counter.xml" file because it is where you can change the color of the counter.

If you want to leave the rectangle with rounded edges just change the "radius"

`<corners android:radius="0dp"/>.`

5. How do I distinguish item category from the list?

Step into the "br.liveo.navigationliveo" package and open the "NavigationList.java" class look for the condition "if (i == 0 | | i == 6 | | i == 10)". If you count from scratch will see that the name "category" is at the 0, 6 and 10 in the `<string-array name="nav_menu_items">` "arrays.xml" file. If you do not want any category is only remove this condition.

6. As I say that a particular item will have a counter?

Step into the "br.liveo.navigationliveo" package and open the "NavigationList.java" class and check the condition below:

case 1:

itemNavigation = new NavigationItemAdapter (title, utils.`iconNavigation`[i], `false`, 1);. The number 1 in red indicates that this item will have a counter;

7. How do I update the counter value?

Step into the "br.liveo.navigationliveo" package. There you will find the methods get "getCounterItemOne" and set "setCounterItemOne" then whenever you need to update the counter use "setCounterItemOne" method. And in class "NavigationAdapter" package "br.liveo.adapter" I call it " `int` counter = ((NavigationMain) getContext ()) getCounterItemDownloads ();". Then open the navigation whenever the value is updated.

In class "NavigationMain.java" look for "onDrawerOpened" method because it is there that updates the adapter in navigation " `navigationAdapter.notifyDataSetChanged ();`"
